ELSEVIER

Int. J. Miner. Process. 46 (1996) 297–298

INTERNATIONAL JOURNAL OF MINERAL PROCESSING

Contents of Volume 46

Research Papers

A method for a financially efficient design of cell-based flotation circuits
G. Schena, J. Villeneuve and Y. Noël 1

Review and analysis of factors controlling the mechanical flotation of gangue minerals
V.M. Kirjavainen 21

The influence of temperature during flotation of celestite and calcite with sodium oleate and quebracho
F. Hernáinz Bermúdez de Castro and A. Gálvez Borrego 35

Slurry discharge capacity of autogenous and semi-autogenous mills and the effect of grate design
S. Morrell and I. Stephenson 53

Oxygen reduction at sulphide minerals. 1. A rotating ring disc electrode (RRDE) study at galena and pyrite
E. Ahlberg and A. Elfström Broo 73

Effect of Fe(III) during copper electrowinning at higher current density
S.C. Das and P. Gopala Krishna 91

The mechanism of interaction between ore fines and porous adsorbents
F.W. Petersen and J.S.J. van Deventer 107

Effect of xanthate chain length on decrease of xanthate concentration in solutions in contact with copper sulphides
M. Szymula, A.E. Kozioł and J. Szczypa 123

Solution properties of thionocarbamate collectors
G. Fairthorne, D. Fornasiero and J. Ralston 137

Flotation of a complex sulphide ore I. Cu/Zn selectivity control by adjusting pulp potential with different gases
X.-M. Yuan, B.I. Pålsson and K.S.E. Forssberg 155

Flotation of a complex sulphide ore II. Influence of grinding environments on Cu/Fe sulphide selectivity and pulp chemistry
X.-M. Yuan, B.I. Pålsson and K.S.E. Forssberg 181

Laboratory studies on ball wear in the grinding of a chalcopyrite ore
K.A. Natarajan 205

The application of a mineral exposure model in a gold leaching operation
S.B. Wen, C.S. Hsih and C.C. Kuan 215

Real-time material balance for flotation plants using a least-squares recursive algorithm
C. Bazin and M. Franklin 231

Dodecylamine collector — pH effect on mica flotation and correlation with thin aqueous foam film and surface force measurements
R.J. Pugh, M.W. Rutland, E. Manev and P.M. Claesson 245

A new procedure for assessing the performance of flocculants
J.B. Farrow and J.D. Swift 263

Penetration velocities in a homogeneous jig bed
T.P.R. de Jong, H.J. Witteveen and W.L. Dalmijn 277

Book Reviews
A Textbook of Hydrometallurgy
K.N. Han 293
Extractive Metallurgy of Copper
F. Habashi 295
